PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of professional experience in building and maintaining scalable enterprise web applications using **MongoDB, Express.js, React.js, Node.js**. Currently working at **Cognizant** as a **MERN Stack Developer** since **Jan 2025**. Experienced in developing RESTful APIs, responsive user interfaces, authentication & authorisation, database optimisation and third-party API integration. Comfortable working in Agile development environments and collaborating with cross-functional teams across development, QA and DevOps. Strong focus on writing maintainable code, troubleshooting production issues and delivering reliable web applications.

PROFESSIONAL EXPERIENCE

Full Stack Developer | **Cognizant, Pune, India** Jan 2025 – Present

Key Contributions & Achievements:

- Developed and maintained scalable enterprise-grade web applications using React.js, Node.js, Express.js, and MongoDB.
- Build reusable and responsive UI components using React.js, TypeScript, HTML5, CSS3.
- Designed and maintained REST APIs supporting business and client-facing applications.
- Implemented authentication and authorization using JWT based security mechanisms.
- Developed CRUD functionalities with integrate backend services with frontend applications.
- Designed and Optimised MongoDB queries and aggregation pipelines for efficient processing of business data.
- Integrate third-party and external business services through REST APIs.
- Investigated and resolved application issue across development and production environments.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Collaborated with QA, UI/UX, and DevOps teams throughout deployment and deployment cycles.
- Used Git and GitHub for source control, code reviews and collaborative development.

PROJECTS

[Traco - Web Analytics & Visitor Tracking Platform](#) | Supabase, Express.js, React.js, Node.js, REST APIs 2026

- Developed a web analytics and visitor tracking platform for monitoring website traffic, OS/browser detection, session replay, heatmaps, IP fingerprinting, cookies and visitor behaviour.
- Built backend services to collect, process and store visitor analytics data using Node.js, Express.js and Supabase.
- Implemented visitor geolocation analytics to provide insights into visitor location and geographic distribution.
- Captured browser, device and other relevant visitor environment information for analytics and reporting.
- Developed analytics views to help understand visitor activity patterns and website usage.
- Designed RESTful APIs for collecting and retrieving analytics data.
- Implemented data processing and aggregation logic to support analytics and reporting features.
- Deployed the application using vercel and integrated the frontend with backend services.

Retail Sales & Inventory Management System | MongoDB, Express.js, React.js, Node.js, REST APIs Aug 2025 – Present

Client: Global Retail Chain (USA)

- Designed and developed scalable backend APIs for products, billing, sales and inventory modules using Node.js and Express.js.
- Developed React.js dashboards for stock monitoring, sales analytics, and KPI reporting.
- Designed MongoDB collections and Optimized aggregation pipelines for processing retail transaction data.
- Implemented real-time stock updates across multiple warehouses.
- Integrated barcode scanner and invoice generation functionality.
- Improved system performance and reporting speed.
- Worked collaboratively in Agile sprints with cross-functional teams.
- Participated in debugging, testing, code reviews and application enhancements.

Secure Banking Application

| Java, Spring Boot, MySQL, React.js

2024

- Developed a secure banking application with user authentication and account management functionality.
- Implemented multi-factor authentication to strengthen the user authentication process.
- Developed RESTful backend services using Java and Spring Boot.
- Implemented JWT- based authentication and token management.
- Applied encryption mechanisms for protecting sensitive application data.
- Developed responsive frontend using React.js with secure user authentication flow.
- Implemented exception handling and validation to improve application reliability.

INTERNSHIP

Creazione Software

| Java Software Developer Intern

June 2024-Dec 2024

- Developed and deployed Java applications, focusing on backend development using Core Java, JDBC, JWT- based authentication.
- Developed and maintained RESTful APIs for application functionality.
- Applied object-oriented programming principles and standard Java development practices.
- Implemented exception handling, multithreading and file-handling functionality.
- Developed interactive web interfaces using HTML, CSS and JavaScript.
- Participated in Agile development activities and collaborated with senior developers.
- Managed version control with Git and collaborated on GitHub for real-time project coordination.

Technical Skills

Languages: JavaScript (ES6+), TypeScript
Frontend: **React.js**, Next.js, HTML5, CSS3

Backend: **Node.js**, **Express.js**, REST APIs, Firebase
Databases: **MongoDB**

EDUCATION

Sandip University, Nashik

2022 – 2025

B. Tech - Computer Science and Engineering - CGPA - 7.28

Nashik, Maharashtra

Government Polytechnic, Nashik

2019 - 2022

Diploma - Computer Engineering - CGPA – 8.03

Nashik, Maharashtra

EXTRACURRICULAR

- University Cricket Team Member – Participated in The Association of Indian Universities (AIU) West Zone Inter-University tournaments.
- Best Bowler Award Winner - State Tournament 2023, Goa.
